# ERRATA

---

The Volume 19, Numbers 3 and 4 issue incorrectly stated the months as January/February. The months should have been shown as January/April.

To the Editor:

A simple reversal of numbers in Table 1 of “Rehabilitating the Deaf-Blind Client” (*JRD*, 1986, 19[3-4], page 5) may cause some readers a problem. The total prevalence for all definitions combined is printed as 743,275. It should be 734,275, as stated in the text below the table. For those who would like a total of *both* the estimated institutionalized and noninstitutionalized deaf-blind populations in the United States, it is 747,457 (734,275 plus 13,182). Another error (the author’s, not *JRD*’s) is the lack of a citation for the “national needs assessment of services to deaf-blind persons” mentioned on page 7: it should be Wolf, Delk, and Schein, 1982. On page 5, the citation is mistakenly given (twice) as Wolf, Schein, and Delk, 1982 – another unfortunate transposition.

Jerome D. Schein, Ph.D.
